Digipol 2023 Summit Report

DIGIPOL
HYDERABAD

Fourth International Security Conference & Expo on HLS

6th – 7th
March 2023

Venue
HITEX
HYDERABAD | INDIA

The Largest Cyber Intelligence Conference & Expo of Asia!

Welcome to Digipol - Hyderabad. Digipol is a Platform for the Law Enforcement and Defence Agencies around the world, to explore the advancements and innovations in digital security technologies. We bring in the experts from Global Law Enforcement Agencies, Defence Organizations and the Industry to share their real time experience and expertise in empowering the security fraternity to foster a safe and secure world.

Digipol was started in 2015 as a Cyber Intelligence Conference and it has evolved itself into an interdisciplinary international event consisting of both conference and expo. Since its conception we have conducted several capacity building exercises for Law Enforcement and Defence Agencies. Today Digipol has become a force to reckon with for delivering mission critical technologies in the niche domain of cyber intelligence.

The Mission

The Mission of Digipol is to internetwork the law enforcement and defence agencies with right security solutions being delivered by various technology developers from all over the world. As part of the summit we conduct technology sessions to demonstrate the advancements of various top notch intelligence solutions. Keynote speeches from senior officers of the law enforcement, defence agencies and experts from the security industry from divergent countries are being invited to the conference to share their knowledge, information, intelligence and actionable experience in countering security challenges facing the world.

Digipol is shaping a new world order of Security in the Region!

Digipol is an integrated platform of Conference, Expo and Capacity Building. We are bridging the dots in reinforcing the security resilience enabled through technology pioneers, disrupting the way policing operates today. While the conventional and legacy security practices are facing their limitations, automation and artificial intelligence are the keywords of modern day policing. We endeavor to help every police and defence fraternity to reach the highest level of standards in modernising the way they operate.

Chief Guest

Dr. G. Satheesh Reddy
Scientific Adviser to Raksha Mantri
Government of India

Guests of Honour

H.E Mr. Gareth Wynn Owen
Deputy High Commissioner
British High Commission

Sri Anjani Kumar IPS
Director General of Police
Government of Telangana

Sri Ravi Gupta IPS
Director General (ACB)
Government of Telangana

Sri C V Anand IPS
Commissioner of Police - Hyderabad
Government of Telangana

Dr. Jitender IPS
Principal Secretary (Home)
Government of Telangana

Sri Anil Kumar
Additional Director General of Police
Telangana Intelligence

Dr. Ranjana Nalamalli
Director - DRDO, Ministry of Defence
Government of India

6th April 2023
New Delhi

Dr. G. Satheesh Reddy
Scientific Adviser to Raksha Mantri
Government of India

सत्यमेव जयते

It gave me a great sense of responsibility and honour in joining as a Chief Guest at Digipol 2023 held at Hyderabad. I found the conference was an immaculate opportunity where Police, Security Agencies, Defence, Regulators and Technology developers all joined under a single roof, discussing the most pressing need of technologies for national security. I was extremely impressed with the Digipol 2023 Conference. The credit goes to Digipol team for organising such a wonderful and outstanding conference.

I believe all visitors of the conference are enlightened by the valuable insights, exchange of ideas and intelligence inputs that will definitely help the security forces in boosting their knowledge, updating about the most current technologies and reach of operations. The exhibits were truly inspiring and thought-provoking, and it provided everyone with a wealth of information that we can use in our future endeavours.

I learnt that organizers are planning Digipol 2024. I wish that it will deliver path breaking innovations and technological progression for homeland security.

Hyderabad

H.E Mr. Gareth Wynn Owen
Deputy High Commissioner
British High Commission

I wish to share my gratitude for you inviting me as your Chief Guest of Honour for DIGIPOL 2023.

I was really impressed by the efficient management of the organizers for successfully conducting an event of this size and magnitude. I'm pleased that the British Deputy High Commission Hyderabad was able to bring the largest foreign industry delegation to the event. British companies are committed to 'Make in India' and their sizable presence at the event is strong evidence of this commitment and their feedback on DIGIPOL 2023 was overwhelmingly positive and many look forward to returning next year.

As I mentioned in my speech, at the heart of the UK-India relationship lies our shared history, values and culture. This has enabled cooperation from everything from agriculture to space and I am confident that events such as DIGIPOL will further strengthen Defence and Security cooperation between UK and India.

I thank the organizers for their warm hospitality and wish them the very best for the coming year.

Hyderabad

Sri Anjani Kumar IPS
Director General of Police
Government of Telangana

Thank you Digipol team for the wonderful conference. I learned a lot, and had a very good time interacting with various technocrats from around the world. Congratulations on both a successful and a memorable conference.

It was a wonderful opportunity in meeting several hundreds of police and defence officers gathering together in exploring technologies for national security. At the same time, it was delightful to witness several exhibitors with their cutting edge digital technologies bridging the knowledge gap for the officers.

I believe the diverse and dynamic group of speakers and exhibitors who came from various countries of the world provided an in-depth insight, as well as, actionable and practical tools of engagement models, methods and mechanisms that have worked in other countries.

Telangana state has been a Pioneer in adopting advanced technologies and we are happy that an International Event like Digipol has adopted Hyderabad as its hosting city.

I wish Digipol a greater success in their forth coming events and believe our security fraternity is immensely benefitted by the conferences.

4th April 2023
Hyderabad

Sri Ravi Gupta IPS
Director General (ACB)
Government of Telangana

I thank the Digipol Team for their energy and creativity in taking the initiative to organise a technology event exclusively for Police and Defence fraternity.

Technology is the keyword for effective policing today. As the technology is unleashing a wave of digital opportunities for the society, the criminals are also capitalising on the ignorance of the citizens who are adopting the technologies that are vulnerable.

Hence it calls for experts from both Government and Industry to foster together the challenges that can be more effectively countered using advanced technologies.

Digipol event proved to be an excellent opportunity for the government leadership and local industry for an exchange of views. This innovative concept has proven so successful that it appears it has become a regular feature of public private partnership in building a framework for resilience in national security.

I personally thank the organisers in conducting a brilliant conference in such a vibrant environment where several technological protagonists gathered together in enlightening our security forces.

Hyderabad

Sri C V Anand IPS

Commissioner of Police - Hyderabad
Government of Telangana

Congratulations on successfully organising yet another Digipol Conference in 2023. It was a wonderful opportunity for all participants from versatile police and defence departments in understanding some of the most advanced cyber intelligence technologies and practices.

I enjoyed the conference very much, with interesting talks, nice exhibitors and the wonderful place. I felt good to speak on the topic "Use of Latest Cyber Technologies in Hyderabad City Police" to the august gathering. I do appreciate your painstaking work in organising the conference, and your hospitality. It was a perfect mix of topics, people, science and gathering. It was wonderful to see this interdisciplinary conference growing steadily.

I was glad to witness some of the best Indian and overseas companies delivering their know-how on maintaining national security. I do believe these technologies are bringing revolutionary changes in transforming the way policing is being operated today. As crimes are shifting from geospatial platforms to high technology cyber domains, it calls for both right technology integration and capacity building. Hyderabad City Police is always on the forefront of adopting latest innovations in security technologies and we are setting up the standards in upholding the safety and security of its citizens.

Digipol 2023 has been a great success in all possible respects. I hope you continue the series and I wish you all the best with that.

Dr. Jitender IPS
Principal Secretary (Home)
Government of Telangana

I would like to take this opportunity to express my heartfelt thanks to you for organising Digipol at HITEX, Hyderabad. It was a great opportunity for all participants cutting across the departments joining for two days exclusive event on National Security.

It was wonderful to witness convergence of several police and defence officers, researchers, professionals, technology developers and analysts joining under a common roof. I strongly believe Digipol event will contribute substantially as a catalyst for the transformation of policing from conventional and legacy system to a modernised and result oriented ecosystem.

The attendees very much appreciated both the conference speeches and the expo. Some of the cutting edge technologies that were demonstrated were highly informative and knowledgeable.

I would like to appreciate you again for a wonderful conference and for all your efforts to make it happen. Digipol was very interesting and stimulating in terms of its content, the participants and the technology demonstrated by the exhibitors. I think it turned out to be a great success.

I wish you success in all your future endeavours.

Hyderabad

Many Congratulations and thanks for the wonderful Digipol 2023 conference and Expo you organised at Hyderabad. The conference was highly informative and technically very knowledgeable. I am thrilled to hear that there is a plan to have another Digipol conference next year as well.

The presenters were well prepared and the sessions were well organised and attended. Everyone felt that you did a superb job in organizing the meetings by selecting the thought-provoking ideas and presenting relevant topics. You have set new standard for conferences on digital technologies in this region. It was an unique opportunity for the security fraternity of the country to witness several cutting edge technologies on display under one roof.

Indeed it was a wonderful and stimulating conference and thank you for your generosity in organising the conference. Those who were able to attend agreed that it was worth every minute of their time spent in the conference. My team of officers who attended the conference heard excellent talks by the speakers and experts of the field and met new protagonists of the technology. Finally they found the whole conference really inspiring.

Digipol 2023 was really great and organised in a very befitting manner. I sincerely would like to thank you and your co-organisers again for a wonderful conference. I am sure you will achieve a new benchmark in taking this conference to greater heights in the coming years.

Dr. Ranjana Nalamalli
Director - DRDO, Ministry of Defence
Government of India

My heartiest congratulations for organising and hosting this wonderful international event. It was a pleasure for me to be part of this event as a Guest of Honour. This was a unique conference where the fraternity of Police and Defence agencies joined together and discussed the emerging cyber security ecosystem.

The conference brought out the importance of digital transformation of legacy systems. The topics were meticulously discussed and demonstrated by various industry representatives. I am sure that every participant has gained significant knowledge in the niche domains of these technology areas. Exhibitors have received good footfall and discussed the products being developed by them.

This kind of conferences significantly impact the process of development of framework for national security, while taking into the account the perspectives of all security stakeholders.

This conference was a fruitful exposure on niche technologies for all participants due to the commendable efforts of the organisers. Thank you for inviting me to be part of this well curated event. I wish the organisers success in their future events.

Sri Paul R Kumar
Director
Digipol

It gives me immense pleasure in welcoming you to the Digipol fraternity. We have concluded yet another successful edition of Digipol.

We as Digipol were instrumental in bringing world class training and Technology to Law Enforcement in India. This is the fourth in a series of conferences we have been conducting since 2015. I am glad to inform you that today Digipol has become the largest Cyber Intelligence Conference & Expo in Asia.

I am indebted to all my coworkers who toiled in making this event highly successful. My team has spent many months planning the event and it showed. I also thank all exhibitors who contributed in terms of their technology and keynote speeches. Indeed their speakers have scilintilated the conference arena with their thought provoking speeches and demonstrations.

We are extremely grateful to the Government of India, Ministry of Defence, Ministry of Home Affairs, DRDO, CDAC, Government of Telangana, British High Commission, Embassy of Israel, Embassy of France, Embassy of Spain and Embassy of USA in extending their help in organising this event successfully.

The next edition of Digipol will be held in 2024 and we hope to bring best of the breed technologies of significance to the region.

The Agenda

The leadership of the Law Enforcement and Security Industries are invited at the Digipol Summit to discuss the innovative trends and key issues that will impact the new world order security. Join at the sessions where your peers, suppliers, policy makers, regulators, customers and competitors are attending modern world security's most important gathering.

The Delegates

Meet the dynamic people from Law Enforcement, Defence Authorities of Government Agencies and the Industry who are invited to join us at Digipol 2023.

- Law Enforcement Agencies
- Tri Services of Defence
- Cyber Crime Police
- Intelligence Agencies
- Crime Investigation Departments

- Revenue Intelligence
- Narcotics Control Units
- Para Military Forces
- SWAT Teams
- Electronic Warfare Units

- IT Wings of the States
- Central Police Departments
- Military Intelligence
- Immigration Authorities
- Counter Terrorism Units

Theme Topics

- Cyber Intelligence
- Lawful Interception
- Big Data Analytics
- Cyber Security
- Secure Communications
- Audio and Video Analytics
- Drones and Anti Drone Systems
- CDR and IPDR Analytics
- Cyber Forensics
- Face Recognition Systems

- Advanced CCTVs
- Biometrics
- Network Security
- Open Source Intelligence
- Social Media Analysis
- SIGINT Solutions
- WEBINT Solutions
- Darkweb Analysis
- Cloud Computing
- Network Hardware

- Narcotics Detection
- Artificial Intelligence and Machine Learning
- Electronic Surveillance
- Crypto Analysis
- Block Chain Technologies
- Data Security
- Electronic Warfare
- Security Training and Consulting
- Smart Cities and Secure Societies

Digipol Inauguration Ceremony

Scientific Adviser to Defense Minister Government of India Dr. G. Satheesh Reddy lightens the lamp and inaugurates the DIGIPOL 2023 in the presence of other dignitaries.

Scientific Advisor to Defense Minister, Government of India, Dr. G Sateesh Reddy inaugurating the DIGIPOL 2023 EXPO in the presence of other dignitaries.

Digipol 2023 Keynote Speakers

Shri C V Anand IPS
Commissioner of Police - Hyderabad,
Government of Telangana
Topic : Use of Latest Cyber Technologies
in Hyderabad City Police

Dr. Ranjana Nallamalli
DRDO, India
Topic : Cyber Security in Defense

Dr. Sriram B
Cybersecurity Centre of Excellence (CCoE-
DSCI), India
Topic : Data Security in a Hyperconnected
World: Implications for
Law Enforcement

Smt. Dija S
C-DAC, India
Topic : C-DAC's Cyber Forensics Initiatives

Mr. Rohit Singh
Telesoft Technologies, UK
Topic : Network Visibility and Threat
Detection in Encrypted Traffic

Mr. Koren Maor
Tech7, Israel
Topic : India Israel Accelerated Program

Digipol 2023 Keynote Speakers

Ms. Audelia Boker
Convexum, Israel
Topic : Countering UAVs and Drones

Mr. Shubhomoy Ashutosh Kar
Cognyte Analytics, Israel
Topic : Actionable intelligence needs in new technology environment

Mr. Matias Schapiro
Logical Commander, Israel
Topic : Creating Next Generation Forces

Mr. Syed Hyder
FORTINET, India
Topic : Simplify Your Network and Security with Fortinet Secure SD-WAN and Hybrid SASE

Mr. Rajat Ahlawat
Crystal Blockchain, Netherlands
Topic : Blockchain Analysis

Mr. Dennis Messmer
VITRONIC, UAE
Topic : Potential of Traffic Management Technology in India

Digipol 2023 Keynote Speakers

Mr. Michael Crawson

Signum Intelligence, UK

Topic : Cellular Analysis Tool

Mr. Gal Dalali

Oversight, Israel

Topic : Interactive XR technology for improving mission planning and decision making skills

Dr Ryan Clarke

Siren, Ireland

Topic : Utilizing Next-Generation Network Graphs for Precision Targeting and Network Collapse of Threat Groups Vectored Against India

Mr. Navneet Daga

Radware, Israel

Topic : Role of API Security in Digital Transformation

Dr Ori Sasson

S2T, UK

Topic : Fighting Cyber Crime with Website and Cloud Forensics

Mr. Jarek Jakubcek

Binance, UAE

Topic : Cryptocurrency Investigations and Binance Assistance to Legal Enforcement agencies globally

Digipol 2023 Keynote Speakers

Mr. Joseph Abraham
Consul for Trade and Economic Affairs
Topic : Keynote Speech

Mr. Chaim Lafshitz Farkash
Elbit Systems, Israel
Topic : Breaking the silos in the world of Intelligence and Investigations

Elbit Systems™

Mr. Philipp Rozhkov
Social Links, Netherlands
Topic : Countering illicit trade on darknet marketplaces and building a digital criminal profile

SOCIAL LINKS

Mr. Assaf Danby
Cyabra, Israel
Topic : Measuring Impact & Detecting Disinformation Within Online Conversations

Cyabra

Mr. Mark Bentley
ClearTrail Technologies, India
Topic : Anonymity Vs You: Accelerated WEBINT insights to identify virality, influencers and unmask suspects across social networks.

ClearTrail

Mr. Kobi Nave
Prelysis, Israel
Topic : Tracking of Instant Messenger's users

PRELYSIS

Digipol 2023 Keynote Speakers

Mr. Gaurav Batheja

iAcuity, India

Topic : Financial Traceability in Combating Crime and Terrorism

Mr. Diptesh Saha

iCyber Defence, UK

Topic : Cyber Crime & Continuous Risk Management

Mr. Krishnadev A

Innspark, India

Topic : Beyond Backups - The Secret to Thwarting Ransomware Attacks and Staying Safe

Mr. Dhiraj Gaur

Recorded Future, UAE

Topic : Criminal Investigations with the help of the Dark Web

Company Introduction :

ACE6 Technology pioneers technological solutions for wireless communication and surveillance. Headquartered in Singapore, the team comprises business and engineering experts backed by a wealth of experience in the telecommunication industry.

In 2017, ACE6 launched mMESH™, a game-changing private wireless communication platform that has transformed mission capabilities for teams. Since then, ACE6 has successfully implemented bespoke mMESH™ solutions globally in the government and private sector. mMESH™ technology can benefit law enforcement, search and rescue, emergency first responders, border and marine security, mining, private security, energy, unmanned platforms and robotics developers, and other industries in need of wireless communication in challenging environments.

Product Description :

mMESH™ is an advance COFDM wireless product that is able to establish an IP-based private communication network in both line-of-sight and non-line-of-sight situation. The mMESH™ wireless network is hub-less, and it can form connections in point-to-point, point-to-multipoint, and multipoint-to-multipoint settings. It's a fully IP-based, broadband wireless solution that keeps people, vehicles and command centres connected in the most adverse and volatile scenarios.

Narayanan Harish
Email : nharish@axon.com

Address : HD-030, Wework Chromium, Jogeshwari, Powai, Mumbai, Maharashtra, 400076, India

https://in.axon.com

Company Introduction :

At Axon, we're helping to safeguard officers and suspects by creating smart, less-lethal TASER devices, providing officers with the necessary technology in order to de-escalate situations. We're defending the truth by equipping officers with body-worn and in-vehicle cameras that automatically collect a record of how events unfold. We're making it easier and more cost effective to catalogue, manage and share digital evidence. And, we're using technology to streamline workflows to free your officers to spend more time policing and less on paperwork and to better protect themselves, their colleagues and the communities they serve.

Product Description :

TASER 7: The first Energy Weapon to be wirelessly connected to the Axon network. Recharge batteries and upload logs via docking and walking, and assign weapons and accessories in seconds with the Axon Device Manager mobile application.

TASER 10: The most sophisticated, accurate and effective TASER energy weapon to date. With a 10-probe capacity and maximum range of 45 feet, TASER 10 ushers in a new era in less-lethal technology.

Body Camera 3: A rugged communications beacon front-and-center on every call. Featuring enhanced low-light performance, reduced motion blur and an LTE connection that enables real-time features like live streaming, Body 3 empowers officers with more support in the moment.

Body Camera 2: designed to record events for secure storage, retrieval, and analysis via Axon Evidence (Evidence.com) or Axon Commander services.

Company Introduction :

Center for Development of Advanced Computing (C-DAC) is a scientific organisation under the Ministry of Electronics and Information Technology (MeitY), Government of India, and has been setup to undertake research and development in information and communication technology and electronics (ICTE). C-DAC is involved in developing end to-end state-of-the-art products, systems, and solutions. This includes consulting, design and development, deployment, and training.

The core technology areas of C-DAC include high-performance computing (HPC) and ICTE services, microprocessors and embedded systems, artificial intelligence and language computing, cyber security and cyber forensics, blockchain technologies, health informatics, augmented reality and virtual reality, 5G/the Internet of Things (IoT)/SDN and smart cities. With 11 centres in India, C-DAC also conducts education and training at all levels of the ICTE. C-DAC has been working on strengthening national technological capabilities in the context of global developments in ICTE.

C-DAC has a proven track record of successfully managing major customer projects and services, such as those for the Election Commission of India (ECI), Employee's Provident Fund Organization (EPFO), eSign, e-Pramaan (Aadhar-based authentication), Mobile Seva, Goa Ranges for the Indian Navy, Software-Defined Radio for the Indian Navy, State Data Centres, State Wide Area Networks, and Adaptive Traffic Control Systems for many cities, setting up the Cyber Forensics Labs.

Product Description :

1. M-Kavach 2 - M-Kavach 2 is a comprehensive mobile device security solution addressing emerging threats related to Android based mobile devices. The major emphasis is on advising the users against security misconfigurations, detection of hidden/banned apps and scanning the device for potential malicious apps installed on the user's mobile device.

2. Parikshan - Automation tool for performing Security Analysis & Vulnerability Assessment of Android based mobile applications and assess the overall security posture of the application.

3. Vishleshak - Vishleshak is a custom Android platform for security and threat assessment of mobile applications. Its rich feature set aids in the faster analysis of mobile applications and get insights into the same.

4. National Blockchain Framework - National Blockchain Framework (NBF) is an initiative of MeitY to make India ready for large scale adoption of Blockchain technology and enable trust for applications in the domain of e-Governance. It focuses on enabling Blockchain-as-a-Service and addresses the research challenges across various layers of the Blockchain stack.

5. Security Assessment using Blockchain - Security Assessment using Blockchain Technology is a 24x7 monitoring tool of critical resources spread across geo-graphical locations. The software maintains security data on Blockchain nodes maintained at stakeholder's premises that ensures tamper-proof maintenance of evidences. Due to the underlying consensus mechanism of Blockchain, stakeholders can be confident of monitoring and assessment reports generated by such an environment. Potential stakeholders include service providers, cyber insurers, system administrators/auditors and consumers.

6. Anetra SDK & Device –
   (a) Anetra SDK is a Software Development Kit(SDK) that can be used in developing webcam enabled facial recognition-based applications for remote monitoring of activities including work from home, study from home etc. The SDK can help to improve productivity of people working/studying from home and ensuring accountability.

M.Kumar
Email : mkumar@cdac.in
Mobile : +917382632324
www.cdac.in

Address : C-DAC, Plot No. 6 & 7, Hardware Park, Kesavagiri (Post), Hyd, Pincode-501510, Telangana, India

Product Description :

(b) Anetra Device is a Video based Biometric face identification Device which is capable to do face identification in real time. The device has features of face detection, face liveness detection and face recognition. The most common application of device is face based employee attendance marking at office entrance setup.

7. Intelligent Video Surveillance and Video Analytics System - The Intelligent Video Analytics system helps to execute useful video analytics on CCTV camera feeds. The system performs Video analytics on CCTV camera feeds in the form of Fire & Smoke Detection and Abnormal Crowd Event Detection. On detection, the system sends alert in the form of E-mail and/or SMS.

8. QSim - QSim (Quantum Computer Simulator Toolkit) enables researchers and students to do research in Quantum Computing. It allows writing Quantum code, essential for developing quantum algorithms. It provides a platform to acquire skills of 'programming' as well as 'designing' real Quantum hardware. It helps to simulate quantum circuits with and without noise and test how well various algorithms work with imperfect quantum components. Quantum simulations are performed on powerful HPC resources allowing multiple users to submit jobs simultaneously with different qubit configurations.

9. MeghSikshak - MeghSikshak is a multilingual e-learning platform which has rich and intuitive features to enhance online teaching and learning experiences. It is being used by several institutions, including State Police Academies, to offer online courses and virtual training to the Police & Defence personnel. For more information visit **https://meghsikshak.in/**

10. BALSAHARA - BALSAHARA is used to automate and monitor the activities of the government run Children Homes and Child Care Institutions on a daily basis including maintaining personal records of the children, effective utilization of the assets and resources available at homes, providing nutritious diet, proper health care, cleanliness & proper clothing, entertainment, education and vocation training for the overall child growth and rehabilitation.

11. ISEA - Information Security & Education Awareness is a MeitY sponsored activity which aims at capacity building in the areas of Information Security to address the human resource requirement of the country, training of government personnel and creation of mass information security awareness. Under ISEA, C-DAC is carrying out StaySafeOnline Campaign by MeitY during the G20 Presidency to spread awareness through Digital Media platforms. We request to Subscribe to #StaySafeOnline (@ssoindia) available in all social media handles.

12. Information Security Services - C-DAC is a CERT-In empanelled organization and offers various information security services like VA/PT, Comprehensive audits and assessment, compliance audit services etc., for IT/ICT, ICS/SCADA , IoT, Blockchain, Telecom systems etc.,

13. CyberCheck - A Disk Forensics software solution for data recovery and analysis.

14. MobileCheck - Digital forensic solution for Basic phones, Feature phones, Smartphones, PDAs and GPS devices.

15. Advik CDR Analyzer - A tool to import and analyze CDR/IPDR logs of any Service Provider in India and generate comprehensive reports integrating Subscriber Data Records and Location Details.

16. Win-LiFT - Live Forensics Suite for the acquisition and Analysis of Volatile Data from Windows Computers.

17. PhotoExaminer - A cyber forensic tool for classifying, enhancing, analyzing and generating the report of image and video evidence.

18. TrueImager - Disk Imaging hardware solution capable of performing hashing, imaging and cloning operations of source storage media and performs wiping and formatting of the destination disk.

Mobile : +917382632324

Address : C-DAC, Plot No. 6 & 7, Hardware Park, Kesavagiri (Post), Hyd, Pincode-501510, Telangana, India

www.cdac.in

Product Description :

19. TrueTraveller - A complete portable forensic kit for performing digital forensics seizure, acquisition and analysis.

20. SIMXtractor - A tool to enable forensics extraction and analysis of SIM Card related information.

21. Next Generation Person Search - NGPS is an AI analytics engine to perform rapid search of suspect or missing person in surveillance videos. The person can be searched given the description like time, direction of movement, gender, age, color and type of dress. Solution is an attribute based person search suitable for Indian Surveillance Environment.

22. V-Scan Face Recognizer - V-Scan Face Recognizer is a powerful computer vision Face Recognition Software tool that detects and identifies persons of interest from an input video clip. Its Artificial Intelligence Engine facilitates face detection, face identification and generates reports regarding target face occurrences in input videos.

23. Crime Analytics - An analytics engine around the data services provided by the crime branch and it's supporting agencies to leverage the Intelligence to uncover security, fraud and cyber detection case using big data framework.

24. Secured BOSS - Secured Operating System for strategic sector

25. Natural Language processing Tool Kit - Software tool kit with TransName (for transliteration of names & addresses from English to Indian languages and vice-versa), NameScore (for comparing 2 given names in Indian languages (including English) to generate a score of them being the same entity and Name search (for cross-lingual Name search). Govt. departments or Law enforcement agencies having large databases of citizens, criminals or accused can find out whether two or more entities /persons are the same from the names entered in different Indian languages or in different ways. Cross-lingual Name search through large bi-lingual database is also possible.

26. Speech Analytics Suite - The Speech Analytics Suite authorize intelligence agencies to convert audio/video content into text, identify the speaker & their spoken language, highlight define keyword and detect number of speakers present in input audio. The input speech audio or voice data can be from different sources for any suspect identification.

ClearTrail

Gaurav Gupta
Email : gaurav.rk.gupta@clear-trail.com
Mobile : +918959715414

Address : SEZ Indore Unit-I, 4-B, STP-II, Crystal IT Park, Indore, Madhya Pradesh 452001, India

www.clear-trail.com

Company Introduction :

ClearTrail Technologies is two-decades old company focused on creating powerful intelligence and investigation technologies for federal and state level security agencies. Our suite of solutions is deployed across 12 countries, enabling security agencies to understand cyber threats through communication data interception, data integration and advanced data analytics by leveraging artificial intelligence models on big data.

Product Description :

ComTrail: ClearTrail's Lawful Interception and Monitoring System, ComTrail enables investigators to rapidly analyse targeted voice and IP traffic by using a combination of graphical tools, data mining frameworks and machine learning algorithms. Its modular architecture facilitates seamless integration of multiple systems, data sources and tools on a single interface.

WebTrail: ClearTrail's Open Source Intelligence System, WebTrail, helps security agencies to gather intelligence from the surface web, dark web, social media and encrypted messengers on a unified platform. Using WebTrail, intelligence officers can constantly monitor polarising public campaigns and trace suspects effectively.

CARBON: CARBON is an offline intercepted PCAP data analysis system that helps intelligence analysts to detect, neutralise and prevent high-tech criminal activities planned or executed via the internet.

Address : B-101 /1, Raheja Plaza, Lal Bahadur Shastri Rd, Mumbai, Maharashtra 400086, India

www.cloudstrats.com

Company Introduction :

Cloudstrats is an exponential technology product company offering Artificial Intelligence platforms powered by Analytics and Automation. Born in India our products help our customers use computer vision, speech and text solutions to solve real world problems. These platforms leverage Advanced analytics, Deep Learning, NLP & Machine Learning to assist Government, & Enterprise entities achieve their long- term sustainable development goals. Our innovations fuel the Indian dream of Atmanirbhar Bharat to accelerate population scale digital transformation in our country and the world. Our portfolio includes Multi Cloud Management & Digital Transformation across industries.

Headquartered in Mumbai, we serve customers in India, USA, Canada, UAE, and Europe. Driven by our core value of 'Customer Obsession,' our team improves Technology Strategy, Information Security, Business Continuity and Process Optimization for our clients. At Cloudstrats, we are OEM agnostic & build technology neutral solutions that place customer interests first.

Product Description :

Our Practice Areas: Artificial Intelligence | Analytics | Automation | Cloud | Security | IoT | Blockchain | Consulting
Our AI Products: Nayan AI | Swar AI | Akshar AI | Heal AI | Predictive AI | SAM AI | Video AI | Grievance AI
Our ICCCs: Health | Education | Transport | Schemes | SRDH | Public Safety | Security

Company Introduction :

Cognyte is a global leader in investigative analytics software that empowers governments and enterprises with Actionable for a Safer World.

Product Description :

- Multi source Fusion and Analytics Platform.
- Next Gen Monitoring Centre with Crypto & Blockchain intelligence.
- Portable Geo locators for covert tactical operations.
- Cyber Threat Intelligence.

COMMUNITAKE

Noam Potter
Email : noam@communitake.com
Mobile : +972545515516

Address : PO Box 344, Yokneam Illit 2069205, Israel

www.communitake.com

Company Introduction :

CommuniTake Technologies Well Recognized in Gartner's 2018 Critical Capabilities for High-Security Mobility Management. In its second year in the Critical Capabilities for High-Security Mobility Management report, CommuniTake.

Product Description :

Technologies improved its scores compared to the previous year. CommuniTake Technologies received the fifth highest score in three use cases: High-Security Government Grade; High-Security Commercial; and Shared Devices. CommuniTake is one of two vendors ranked that offers both a hardened mobile phone and a hardened mobile OS. CommuniTake Technologies, the leader in high-security mobility management, announced the introduction of its new ruggedized IntactPhone R2. This handset is designed to protect security-minded organizations, operating in both harsh and corporate environments, against mobile cyber-attacks.

Convexum

Amir Gal
Email : amir.gal@convexum.com
www.convexum.com

Address : 6 Totzeret Ha'Aretz Street, ToHa Tower, Tel-Aviv 6744129, Israel

Company Introduction :

As the usage of commercial drones continues to proliferate, security officers to sensitive sites are facing escalating threats. To safeguard their sky perimeters against unauthorized drones, they are seeking an effective response that is tailored to their specific needs without compromising any existing security frameworks. Ensuring the safety and protection of communities – including people, assets and critical infrastructures- necessitates a comprehensive approach that goes beyond simply implementing more technology. This multifaceted challenge can only be addressed through tight collaboration among the key stakeholders in Unmanned Traffic Management, including regulatory bodies and law enforcement agencies.

Product Description :

Convexum is an autonomous and Integrated Protocol Intelligence counter-drone solution solution, providing 4 layers of security:

Detect – Monitor 24/7 and alert in real time about unauthorized commercial drones.
Track – Accurate locating both drone & operator, including, height & speed.

Identify – Identify drone vendor, type & Serial Number. Friendly drones can be added to the allowlist according to their serial (tail) number.
Mitigate – Automatically taking over & safely land drones in a designated zone or use "smart disconnect".

corsight

Prashant Kaul

Mobile : +919650023124
www.corsight.ai

Address : Prashant Kaul, A 116, DDA Shed Okhla Industrial Area Phase 2, New Delhi 110020, India

Company Introduction :

Corsight AI is dedicated to creating industry-leading facial recognition technology with unrivaled speed, accuracy and privacy. The technology is powered by Autonomous AI®, the most advanced artificial intelligence system developed by top AI researchers and backed by more than 250 patents. Our mission is to radically enhance the world of facial recognition technologies while holding ourselves to the highest ethical standards in personal privacy protection.

Product Description :

In summary, with the solution, you can expect to:

1. Improve **PUBLIC SAFETY & SECURITY** through faster and more accurate speed of engagement and resolution.
2. Improve **RESTRICTED AREA MANAGEMENT** through faster and more accurate detection.
3. Improve **REAL-TIME THREAT DETECTION** through faster and more accurate detection
4. Increase **LOSS PREVENTION** through early detection through speed and accuracy
5. **SEAMLESS ACCESS** with speed and accuracy of detection
6. Manage and track **EMPLOYEE AND VISITOR ATTENDANCE** through speed, accuracy and advanced analytics.

cyberbit

Vijaya Kumar Busetti
Email : vijaya.busetti@cyberbit.com
Mobile : +917019371922
www.cyberbit.com

Address : Bangalore, India

Company Introduction :

Cybersecurity is driven by people, process, and technology. At **Cyberbit,** we believe in people. Our mission is to keep organizations safe by boosting information security team performance. We believe that after we've invested in security technology, our teams must be world-class experts in using it. We believe that security leaders must have factual and quantifiable information about their team's readiness. Our platform enables security leaders to maintain a world-class SOC team and keep it read and ahead of attackers.

Product Description :

Prepare for Attacks on ICS/OT Networks

Simulate attacks on operational technology (OT) networks to maximize your skills in defending critical physical infrastructure such as power grids, manufacturing lines, oil and gas, and more. Cyberbit provides a full-scale, emulated OT network, including HMIs, hardware controllers (PLCs), and physical devices, and provides end-to-end simulations of IT to OT attacks. Cyberbit's live-fire cyber range simulations are the closest your team will get to a real-world incident. By training in cyber range exercises your team will excel, both technically and mentally, when the real attack takes place.

CYBERGLOBES

VSR Srinivas
Email : srinivas@convergencepl.com
Mobile : +919493185496
www.cyberglobes.com

Address : Cyberglobes, Halkikei Haor 16, Beer Sheva, Israel

Company Introduction :

Cyberglobes provide a state-of-the-art system for law enforcement to prevent criminal activities
Our system scans and analyzes the data sources to discover criminal activities, such as drug trafficking, financial crimes and fraudulent activity, Our prevention technology covers the widest range of your sources. We preform cross-references between several types of information which are then available in a friendly visual display.

Product Description :

- Text analysis including semantics, entity extraction, and words cloud

- Determinates top influence and leading public opinion in conversation content

- Graphical relationship map, exposing imposter profiles by making links between different social media outlets

- Visual presentation on a map for content that indicates a place (by reverse geo text)

CYBERSECURITY CENTRE of EXCELLENCE
A joint initiative of DSCI & Government of Telangana

Email : sriram.b@dsci.in

Address : (DSCI) CtrlS Data Centres, 4th Floor, Inorbit Mall Road, Hyderabad, Telangana, India-500081

https://ccoe.dsci.in

Company Introduction :

The Cybersecurity Centre of Excellence (CCoE) is a joint initiative of the Government of Telangana and DSCI setup to fulfil DSCI's commitment towards creating a safe, secure and a trusted cyberspace. Our objective is to build best practices, standards and execute initiatives in cybersecurity and privacy domain. We nurture a culture of innovation by, incubating start-ups, conducting trainings / workshops / events, showcasing products in experience zone, hosting delegations and collaborating in local, national and international initiatives. We achieve these core objectives by creating engagements that align to our vision and mission.

Product Description :

The Cybersecurity Centre of Excellence (CCoE) is a glocal hub based in Hyderabad to catalyse innovation, entrepreneurship and capability building in cybersecurity and privacy. Hence, we do not create any products.

DARKOWL

David Alley
Email : david.alley@fze.darkowl.com
Mobile : +971566728864

Address : 216 16th St Ste 700, Denver, Colorado, 80202, United States

www.darkowl.com

Company Introduction :

We are the industry's leading provider of darknet data, offering the largest commercially available database of darknet content in the world. Command Access To The Dark and Deep Web Data You Need Monitoring the darknet for direct or potential threats to your business is challenging and time consuming but essential to keep your business, customers and brand secure. DarkOwl's industry leading darknet product suite allows you to create automated monitors for your business, so you can take action to prevent potentially devastating cybersecurity incidents.

Product Description :

- API products enable enterprises to integrate DarkOwl data into their native environment.
- Datafeeds can be customized to deliver unfiltered data at scale Access to "deep darknet".
- While others claim to collect content from the darknet, many have limited access and crawl only the landing pages of most sites. Dataset is cleaned and stored in a secure environment Isolated entities such as email addresses, social security numbers, and cryptocurrencies allow users to quickly identify important data . Included metadata and source content provides contextual information Vision app provides user-friendly .

Siren's patented technology is uniquely search based providing the user with easy to use search, analytics, visualization and reporting capabilities for investigations on all data types at all scales of data volume.

Product Description :

Siren is a flexible, investigative intelligence platform that uses a data model to drive the discovery of associated data.

Siren Investigate is the Siren Platform user interface. Powered by the data model, it coherently blends:

- Full-text search with support for misspellings, phonetics, relevance ranking, highlighting and more;
- Business intelligence and scientific visualizations;
- Relational set-to-set navigation and drilldowns: pivot operation across connected big datasets;
- Link analysis allows you to explore the connections in your data;
- Geo / Temporal analysis to allow multi-layer, interactive maps and time analysis.

Company Introduction :

Tvisha Systems Pvt. Ltd. is a premier product development company that serves global clients worldwide with its innovative and highly functional products. It creates software products that help businesses of all sizes streamline their operations through automation and other cutting-edge innovations.

Product Description :

Troop Messenger, a product of Tvisha Systems, is a purpose-built solution for workplace communication and collaboration. With Troop Messenger, employees across locations can connect with co-workers via chat, audio-video calls, and conferences. Additionally, schedule Adhoc and planned meetings with internal employees and external company stakeholders to exchange business conversations can be set up for an unlimited time.

Troop Messenger offers a secure collaboration platform with world-class and military-grade security protocols to encrypt chats, calls, conferences, and files.

ULTRA | Forensic Technology

Susana Glad
Email : **events@ultra-ft.com**
Mobile : **+14384585252**
www.ultra-forensictechnology.com/en/

Address : 800 Hymus Boulevard, Quebec, Canada

Company Introduction :

Ultra Forensic Technology is the pioneer of automated ballistic identification, and the creator of IBIS (Integrated Ballistic Identification System) technology used in over 80 countries to combat and prevent firearm crime.

Over the last 30 years, Ultra Forensic Technology has championed innovative technology and invested in research and development that furthers the creation, enhancement, and discovery of new crime-fighting solutions.

Product Description :

IBIS : Ultra Forensic Technology offers the world's most advanced ballistic identification solution, IBIS® (Integrated Ballistic Identification System).

3D Microscopy : This groundbreaking virtual comparison microscopy solution provides firearm and tool mark examiners with the best 3D visual and quantitative tools for common source determination.

Rapid DNA : The wait is over: Accurate DNA analysis in less than 2 hours, in the lab or in the field.

Mobile : +918134087340
www.teamkarimganj.com

Address : 301C, Sukkur Choudhury Lane, Settlement Road, Karimganj – 788712, Assam, India

Company Introduction :

Team Karimganj is a managed technology service provider specialising in web intelligence, OSINT, SOCMINT, Darkweb Int, data collection, data analysis, automation and managed threat detection & response. Our data is used by some of the major technology companies and social media platforms in the world to keep their users safe from online threats and malicious content.

Product Description :

Team Karimganj provides customised online intelligence as a service using both human analysts and automated tools. By virtue of our collaboration with an Israeli hi-tech company (which is currently our biggest client), we have been trained in the fields of web intelligence and cyber security by former members of the 8200 Unit of the Israel Defense Forces.

Our capabilities include intelligence collection from the most remote corners of the clearnet, social media, deep web and the dark web. We are experts in online persona creation and management as well as infiltrating denied areas on the internet. While our automated tools can collect data at scale from any source and our reverse/offensive engineering capabilities can help in precision intelligence collection as well as neutralisation of threat actors.

Address : Plot Number 8, Hulimangala Post Jigani, Hobli, Anekal, Taluk, Karnataka 560105, India

www.urbanmatrix.co.in

Company Introduction :

UrbanMatrix Technologies Private Limited is a drone manufacturing company based in Bengaluru currently known for developing the most advanced drone ecosystem for Survey and Surveillance. Our extensive R&D and on-site experience for more than 7 years has helped us manufacture a highly robust, reliable and user-friendly product, which are the top 3 pain points in the drone industry. Our drone has been designed to revolutionize the world of automated operation with longer flight times and autonomous patrolling capabilities. It's India's first 4G / 5G UAV which allows viewing of live-video feed and controlling it from anywhere in the world. It's possible using an Edge Computing device which runs on our proprietary Drone Operating System, MatrixOS.

Product Description :

The UMT Hawk4G is a Vertical Takeoff and Landing (VTOL) Small RPAS consisting of a Remotely Piloted Aircraft (RPA) and a Ground Controller, that together act as a portable system for day and night local area low altitude aerial surveillance and security applications. The entire system has been indigenously designed and developed by UrbanMatrix Technologies Pvt. Ltd. The drone is capable of functioning with different payloads, making it useful for surveying, inspection and surveillance, as well as crowd control.

Veri Once

Sheetal Srikanth

Email : **sheetal.s@verionce.com**
Mobile : **+917022545495**

Address : T Hub 2.0, Inorbit Road, Hyderabad, India

www.verionce.com

Company Introduction :

Make all credentials globally portable, verifiable, authentic, secure and useful.Create world's largest digital Blockchain Ecosystem of Individuals, Academic Institutions, Skilling Organizations and Employers facilitate authentic and secure way of exchanging credentials and useful.We seek to be characterized by our passion, integrity, entrepreneurialism, and our innovative spirit, as we continually strive to fulfil our vision. These values guide us in all the work we do and are the bedrock upon which our organization is built.

Product Description :

Blockchain - Blockchain technology has allowed Veri Once to develop a secure platform to digitize verified credentials. An encrypted tamper-proof wallet stores all uploaded documents. This blockchain technology helps employers and university admission officers combat fraudulent documentation. Veri Once creates a higher level of digital trust.

Largest Ecosystem - The Veri Once platform is globally scalable and has the ability to be the largest ecosystem of credentials worldwide. The platform can integrate with your existing applications, eliminating the traditional background verification process.

Nivedita Sharma

Company Introduction :

We are a system integration firm engaged in the process of deploying smart surveillance solutions to our customers through effective design consultancy and globally proven implementation processes.

We provide innovative and smart video surveillance solution that aid in proactive protection of assets, simultaneously providing business intelligence that aids in smart decision making.

Product Description :

SMART Video Surveillance - Vihawk, is a provider of smart video surveillance solution that provide proactive and smart solution to any business need. Please take a dig into some the real-time video analytics that are helping the businesses not only in providing proactive security but also aiding in business decisions.

Dennis Messmer

Email : **dennis.Messmer@vitronic.com**

Mobile : **+971588032714**

Address : Dubai Hills Business Park 3, Dubai Hills, Dubai, UAE

www.vitronic.com

Company Introduction :

VITRONIC is a leading provider of machine vision systems and namely traffic technology, offering solutions such as automatic license plate recognition (ANPR) systems, traffic monitoring cameras, and red light enforcement systems. These technologies are designed to improve traffic flow and safety for all kinds of road users. Development and production of VITRONIC systems are located at the company headquarters in Wiesbaden, Germany. VITRONIC group companies in North America, Europe, Asia and Australia, as well as a worldwide network of sales and service partners, provide local support to international customers.

Product Description :

In the transport sector, VITRONIC offers leading technology for increased safety on the roads, for optimizing traffic flow and for recording road usage. In three main fields VITRONIC systems ensure high performance and maximum output to enable the operators to use precise data: Public Safety Enforcement, Traffic Enforcement and Tolling.

Hereby, the combination of VITRONIC hardware solutions and software for processing the captured data onsite helps to increase efficiency.

POLISCAN measuring systems capture significantly more speed offenses to improve road safety. A single measuring system monitors several lanes and up to two directions of travel simultaneously. They can also detect both approaching and receding traffic. POLISCAN Redlight enables contact-free operation without any expensive road-embedded equipment.

DKONECT
CONNECTING OPPORTUNITIES

INTERCONNECT WITH POLICE AND DEFENCE AGENCIES OF THE REGION!

Digipol is a unique opportunity for product vendors to demonstrate products and systems to a wide audience comprising of key figures from the police, defence and decision makers with procurement capability.

Digipol promotes DKonect, a platform that helps in Interconnecting Police, Defence and Security Agencies of the region with best of the companies developing mission critical and cutting edge solutions.

The platform offers a unique opportunity for police and defence agencies to engage with pre-screened vendors for product evaluation and POCs. Focusing on interoperability between defence and security, DKonect brings together police and military officials, end users and decision makers from several states and federal agencies, making this an effective platform for rapid business growth and development.

All exhibitors at the Digipol are listed on the DKonect page where the Police or Defence agencies would like to read or learn about the product portfolio. Most of the time procuring agencies are groping in the dark about competent suppliers and their respective contacts. This platform is a unique platter that helps in networking and interconnecting with the respective buyers who are in search of classified products.

This platform is not just for the exhibitors of the Digipol, other technology suppliers and vendors can also register their products.

The DKonect web page contains the list of all security product suppliers, however the list is visible to registered Police and Defence Agencies only. The agencies that are interested in checking product portfolio needs to register with their official credentials.

The registration at DKONECT is Free for all Product Vendors and Security Agencies. Use the below link for the registration and login.

www.digipol.org/dkonect.html

DTraks is dedicated to providing the most comprehensive training of Law Enforcement classes and seminars.

Police and Defense officers are expected to possess a reasonable understanding of the latest developments in technology along with its legal implications. Highly trained security professional work with the purpose of aiding criminal investigations through analysis, observation, testing or expert testimony.

Most of the police and defense academies are modelled on military training programs which instil a high regard for physical conditioning and performance. With the changing crime vectors from physical geo spatial locations to virtual cyber space, it is imperative that the security professionals be equipped with highly specialised skills in the domains of Digital and Cyber Technologies.

Our class room oriented training is imparted by domain experts with exposure in fighting global crimes and with international cross functional exposure on crime vectors.

Majority of all the trainings are offered FREE of cost to all Police and Defense agencies. Kindly check the website for future training events.
