

Digital World of Global Policing Summit

In Association With

Report on

DIGIPOL Summit Hyderabad, India

11th & 12th
February 2019

GLOBAL EXPO AND TRAINING FOR LEAs

The Digipol Summit

The digital revolution is fundamentally changing the world. The effects of an increasingly digitalised world are now reaching into every corner of our lives with the convergence of Computers, Internet, Mobile, Social media and IoT at the forefront. The world is experiencing transformation of Crime Vectors and Investigative Practices. Rather the Crimes are shifting from Geo Spatial platforms to unimaginable, unseen deep and dark web spaces.

Law Enforcement Agencies are facing many difficulties in countering these threats, in particular the constraints relating to information sharing, data privacy laws, multi jurisdiction issues and lack of competent manpower on dynamically changing technologies.

The key to effective policing is adoption of right technology and capacity building. Hence it is our endeavor to create a right eco system where the leadership of police, innovators, protagonists of Technology, Researchers, Vendors and other stakeholders join together on a common platform for deliberating on the most pressing needs of Law Enforcement Challenges.

Our Vision

The vision of DIGIPOL Summit is to create a platform for the Technocrats, Innovators, Researchers, Security Specialists, OEMs, Vendors for internetworking with protection forces of the world (Police and Defense). The mission is to promote technology, discuss new innovations and address the issues & challenges the Law Enforcement Agencies are facing.

The Summit

The Summit has witnessed over 1150 dignitaries of Law Enforcement Agencies including officers from France, India, Nepal, South Africa, South Korea, U.K and U.S.

The Summit attracted 52 exhibiting companies from Canada, India, Israel and Singapore, displaying diverse products on Data Analytics, Intelligence Gathering, Social Media Analytics, Advanced Tactical Intelligence Solutions, Video Analytics, Darkweb Analysis etc.
